Questions:

1) what did you learn/gain from this training program? (Did the organizing; objectives and outcomes meet your expectations?)

The training program was really interesting; the best was to compare the other forms to work around the Europe. I liked to see the work way with the ASD people during all their life and known the "solutions" when that people become to adult life (work, space for living, leisure, etc.).

2) How was the TC atmosphere and the cooperation - brainstorming among the participants?

The atmosphere was friendly, the other colleges was really interesting and all the time-sharing their work way and really curiosities about other partners. In general, I felt really good atmosphere and really good cooperation.

3) Was it your first participation in an Erasmus+ Project Mobility? What are your impressions/ experiences in general? Would you participate again in a similar action?

Yes this was my first participation. And I found really interesting, its really important for to know others kinds of work and other forms for ASD people, and I think it is important for the future work in the TRAIL project.

And in the other hand, it is more interesting for knows much more the other partners.

4) Are you going to implement any of the training materials- methodologies at your working environment? If yes, which part(s)?

I thing the all-most program it's really interesting for start to work in my job. I think the important thing it's to listen the people with an ASD and learning disabilities and their families. For me, it's too much important to discover what they need and what they want.

Questions:

1) what did you learn/gain from this training program? (Did the organizing; objectives and outcomes meet your expectations?)

The organizing and the objectives was really good, I fell really comfortable and really integrated whit the other partners.

The experiences in general were really good. I come back to Spain with more questions and new ideas for my work.

2) How was the TC atmosphere and the cooperation - brainstorming among the participants?

All the time the people was really friendly and they wanted to give a hand ant to share knowing.

3) Was it your first participation in an Erasmus+ Project Mobility? What are your impressions/ experiences in general? Would you participate again in a similar action?

Yes it's my first time in Erasmus+. For me was a good experience for to grow up in my professional live. It was to really interesting to known and to learn other form to work. And in the other hand, it is more interesting for knows much more the other partners.

4) Are you going to implement any of the training materials- methodologies at your working environment? If yes, which part(s)?

Yes, I think the program is great for to improve my day job. In theses moment I work in private phycology company, only for families who wants a therapy.
